Maximum Marks	2 Marks

Customer Problem Statement Template:

For the project “Smart Library Request Workflow in ServiceNow,” the customer problem statement helps us understand the needs and challenges of library users and staff. By focusing on their perspective, we can create a solution that improves the efficiency and user experience of library operations. This approach allows the team to empathize with users and design a workflow that is simple, automated, and effective.

Example Problem Statements (PS) for Smart Library Request Workflow

PS-1:

- I am a student
- I’m trying to request and borrow books from the library efficiently
- But the manual request and approval process is slow and confusing
- Because I have to wait for librarian approval and track requests manually
- Which makes me feel frustrated and delays my studies

PS-2:

- I am a librarian
- I’m trying to manage book requests and approvals quickly
- But the current system is manual and prone to errors
- Because requests, approvals, and tracking are done on paper or spreadsheets
- Which makes me feel overwhelmed and reduces productivity
