

Project Design Phase
Problem – Solution Fit Template

Date	24 March 2026
Team ID	69bf7fca443e4a653d45f826
Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	2 Marks

Problem – Solution Fit

1. Problem Identification (Customer Pain Points):

- Students and library users face **delays in book requests** due to manual workflows.
- Librarians struggle with **tracking requests, approvals, and overdue books**, leading to inefficiencies.
- **Lack of transparency** in request status causes frustration for users.
- Existing processes rely heavily on emails or physical forms, resulting in **errors and missed notifications**.
- Reporting and analytics for library usage are **time-consuming and error-prone**.

2. Target Customer / User:

- College / University students who borrow books from the library.
- Library staff / administrators managing book requests and approvals.

3. Behavioral Patterns:

- Students frequently **check email or visit the library** to know request status.
- Library staff **manually approve requests and send notifications**, which takes time.
- Both users prefer a **simple, digital interface** accessible via desktop or mobile.

4. Solution Description (Fit to Problem):

- **Automated Library Request Workflow** in ServiceNow that handles request submission, approval, and notifications.
- **Real-time tracking** of request status visible to students via the portal.
- **Automated notifications** for approvals, rejections, and overdue books.
- **Dashboard for library staff** to monitor requests, approvals, and reports efficiently.
- Integration with **existing user accounts (Gmail / LinkedIn)** for secure login.

5. How the Solution Solves the Problem:

Problem / Pain Point	Solution Provided	Benefit / Fit
Delayed book approvals	Automated workflow for approvals	Faster request processing
Manual tracking by librarians	Centralized dashboard for tracking	Reduces errors and saves time
Lack of transparency	Real-time status updates	Improves user satisfaction
Missed notifications	Automated email / portal notifications	Keeps users informed
Inefficient reporting	Reports & analytics dashboard	Easy decision-making for library management

6. Key Purpose Achieved:

- Solves the **urgent problem** of slow request processing and lack of transparency.
- Fits into **students' digital behavior**, using portals and email notifications.
- Enhances trust and adoption by **reducing frustration** and providing **efficient workflows**.
- Provides actionable insights for library management via **reports and dashboards**.
