

Functional & Performance Testing Template

Model Performance Test

Date	25 March 2026
Team ID	69bf7fca443e4a653d45f826
Project Name	Smart Library Request Workflow in ServiceNow
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	User Login Validation	Enter valid and invalid credentials in ServiceNow login	Valid users can log in; invalid users receive error		
FT-02	Borrow Request Submission	Fill Borrow Request form with valid/invalid data and submit	Request accepted for valid inputs; error message for invalid inputs		
FT-03	Approval Workflow	Submit a borrow request and check librarian approval flow	Request moves to librarian for approval; status updates correctly		
FT-04	Request Status Update	Check if approved/rejected requests update the request status	Status shows “Approved” or “Rejected” correctly		
FT-05	Notifications	Verify email or system notifications are triggered	User and librarian receive notifications for request actions		
FT-06	Table Link Validation	Check relation between Book table and Borrow Request table	Correct book info appears in request; request links back to book		
FT-07	Role-based Access Control	Test librarian vs user access	Users can create requests but not approve; librarians can approve		
FT-08	Data Validation	Enter incorrect data types (e.g., text in numeric fields)	System shows validation errors and prevents submission		

PT-01	Response Time Test	Measure time to submit and approve a request	Each action should complete within 3 seconds		
PT-02	Concurrent Requests Test	Submit multiple requests simultaneously	System handles multiple requests without slowdown		
PT-03	File Attachment Test	Upload book-related PDFs in request form	Files upload successfully; system does not crash		
PT-04	API Connection Test	Check if ServiceNow API calls (e.g., get book info, update request) work	API responds successfully and updates tables
